

Task One

Go to the website:

www.topmarks.co.uk/interactive.aspx#fmaths. (free resources)

Select the activities “counting to twenty” big and small and building blocks and complete the tasks

Think about what is effective about these sites

Evaluate the level of interaction achievable by these sites

Evaluate whether the sites allow the user to manipulate objects

What could be improved on the sites-what might Foundation stage children find difficult to achieve on these activities?
